The screenshot shows the GREE VRF Selector software interface. The main window is titled "Outdoor unit editing" and contains fields for Unit name, Power specification, Function type, Outdoor unit series, and Model of ODU. It also displays a table for Maximum design configuration rate and Design condition parameters. A sidebar on the left lists indoor units connected to the system. Annotations with yellow dashed lines and arrows point to specific UI elements: a button to add a system, a button to copy a system, a button to edit a system, and a button to delete a system. The interface also includes a table for indoor units connected to the system and a table for indoor units not connected to the system.
